The claims relate to subject matter for which no search is required according to Rule 39 PCT. Given that the claims are formulated in terms of such subject matter or merely specify commonplace features relating to its technological implementation, the search examiner could not establish any technical problem which might potentially have required an inventive step to overcome. Hence it was not possible to carry out a meaningful search into the state of the art (Art. 17(2)(a)(i) and (ii) PCT; see PCT International Search Guidelines, Chapter 9).

Due to the fact that the application as originally filed in toto contains no subject-matter for which a search needs to be carried out, and the limitations posed on amendments by Rule 70.2(c) PCT it is not possible to overcome the defects in the international phase. Analogous dispositions existing in the EPC (Rule 45, Art 52(2) and Art. 123(2) EPC) the same applies to an eventual regional phase before the EPO.
